REMBRANDT

The ultimate portrait for the most discriminating of tastes, our Rembrandt is meticulously printed and lovingly enhanced by the finest portrait artists to define eyes, highlight features, blend skin tones and subdue fine lines. Also included is cropping and complete environment retouching. It is then finished with either a beautiful fine linen texture or canvas mount. This is a family heirloom that generations to come will enjoy.

PRESTIGE

Made entirely by hand, these top-of-the-line portraits are printed on custom enlargers for the finest in skin tones and overall color density. Detailed portrait artistry subdues imperfections and fine lines to even out, blend and highlight facial skin tones. Retouching is limited to the face only. Portraits are then board mounted and an artist's pallet knife texture is applied. Portraits are then covered with a luster spray, and are ready for framing.

LACQUERED CLASSIC

Our Lacquered Classic is machine printed, and cropping is included. The Lacquered Classic is un-retouched and is double-weight mounted for support. It is also protected with a clear luster spray and is ready for framing.

SATIN PRINTS

Machine printed, available with limited cropping.
These are un-retouched 'natural color' portraits.
